Introduction

Game Summary Pitch

Dreamscape is a two game mode experience, one a Shooter and one a Survival game. Characterized by its surreal environment, sound, and design, Both modes of dreamscape place you in a dreamlike environment, with the main goal of having fun.

Inspiration

The FPS portion of Dreamscape was inspired by old retro shooter games such as Doom, with their linear level designs and enemies that stand still while they shoot at you, allowing you to memorize levels and play faster based on that

The Survival portion of Dreamscape is a simple idea based on the very core of every survival game like minecraft. The goal was to give it the core survival game aspects, while giving it a twist to make it unique.

Player Experience

Players in both game modes will have text boxes when the game starts. These boxes will tell them a general idea of what to do, as well as the controls for the game. The survival tutorial box is a bit more complex, adding a narrative as well as a general set of steps players should follow if they want to beat the game. The Shooter tutorial is simpler, telling the player the controls and letting them figure out the rest, although there are more guiding text boxes as the levels go on.

Platform

- PC

Development Software

- Unity

Genre

- Shooter
- Survival

Target Audience

Fans of old classic arcade style shooter games, as well as fans of indie games who like playing things outside of the norm.

Concept

Gameplay overview - FPS

- Basic WASD movement and mouse directed aiming and shooting
- No ammo or resources to watch besides health and powerup timers
- dashes to speed up movement
- Different enemy types
- Doom style maze levels with singular objective - find key to open door to next area

Gameplay overview - Survival

- Basic WASD movement and mouse directed aiming
- Typical survival based progressing, wood tools -> stone tools -> metal tools

- End goal is to make a rocket ship while surviving on the island to be able to escape

Theme Interpretation

- Inspirations from doom-like games in term of level design
- Graphics with mixed 2d/3d/real png designs similar to *Ratshaker*
- Dream-like, unrealistic, surreal aesthetic

Primary Mechanics

Mechanic
WASD movement w/ short jumps via space
Simple mouse/click directed shooting
FPS - Right click to dash

Secondary Mechanics

Mechanic
FPS - Collectable coin-like objects for points
FPS - Score counter for killing enemies
Both - different enemy types
Survival - Hunger Bar

Art

Theme Interpretation

- Inspirations from doom-like games in term of level design
- Graphics with mixed 2d/3d/real png designs similar to *Ratshaker*
- Dream-like, unrealistic, surreal aesthetic

Design

- Dream-like
- Pixelated real png for graphics to give surreal semi-realistic vibe

Audio

Music

- Purposefully random audio, sources taken from countless different places to add to the absurdity of the game

Sound Effects

- Same as music, random audios purposefully selected to make the game very unrealistic and almost comical with certain noises / effects

Game Experience

UI

FPS - Top left hold a heart with health %, while top right has a running score
Surviva - top left holds health as well as hunger

Controls - FPS

Keyboard

- WASD directional movement
- Space for jumping
- Mouse movement for view
- Mouse left click to shoot
- Mouse right click to dash
- E to interact with items

Controls - Survival

Keyboard

- WASD directional movement
- Space for jumping
- Mouse movement for view
- Mouse left click to hit
- E to interact with items
- F to see food
- C to craft
- Tab to open inventory
